ABOUT THE EVENT

The move from specialist to strategist, from ledger to leader, is far from straight-forward. Technical expertise provides a solid career footing, but leadership demands a dynamic and finely-tuned set of skills. Recent years have seen a greater evolution of the traditional control responsibilities of finance functions, with organisations expecting more from their finance teams than ever before.

This interactive course will address core technical and leadership skills, enabling you to step up as a fully-fledged finance business partner. You will walk away with the tools to lead under pressure, learn high-level communication skill to empower you as a leader of change, and be braced to tackle any challenge.

You will also have front-row seats for an exclusive Finance Leaders Panel, where established finance and accounting leaders will share their personal stories and help you turn insight into action.

TRAINING DELIVERY AND PRE-COURSE QUESTIONNAIRE

This workshop will be delivered using a three tiered approach. The structure of each session is as follows:

- 1. Technical overview and review of research into the topic area under discussion
- 2. Practical application of management principles in the review of case studies, worked examples and interactive exercises
- 3. Discussion of outcomes and implementation issues

Workshop participants will have the opportunity to include comments and questions about issues outlined in the program by way of a pre-course questionnaire. This feedback will enable the course facilitator to adjust content accordingly. The workshop has limited places to allow for customisation, greater interactivity and for individual concerns to be addressed.
