ABOUT THE EVENT

COVID-19 has created a new normal for the Higher Education sector, revolutionising the online learning landscape, reshaping application processes, and refreshing crisis management strategies. Higher Education leaders must now undertake work of a more complex nature, operating in an autonomous and strategic manner. As such, it is essential emerging leaders be better equipped with the appropriate tools to achieve success, develop greater strategic awareness and effectively engage with senior leadership.

Developed specifically for HEW Level 7-9 professionals, this two-day workshop will provide an opportunity to advance your core competencies and skills, and explore the emerging leadership capabilities required for effective HEW Level 7-9 managers and leaders. It will explore the core attributes of successful leadership within the Higher Education environment, particularly in this time of heightened isolations, unpack practical strategies for leading productive teams, improve decision making, apply strategic management thinking and develop key stakeholder engagement and communication skills.

TRAINING DELIVERY AND PRE-COURSE QUESTIONNAIRE

This workshop will be delivered using a three tiered approach. The structure of each session is as follows:

1. Technical overview and review of research into the topic area under discussion
2. Practical application of management principles in the review of case studies, worked examples and interactive exercises
3. Discussion of outcomes and implementation issues

Workshop participants will have the opportunity to include comments and questions about issues outlined in the program by way of a pre-course questionnaire. This feedback will enable the course facilitator to adjust content accordingly. The workshop has limited places to allow for customisation, greater interactivity and for individual concerns to be addressed.
