## ABOUT THE EVENT

In today's fast-changing and highly competitive business environment, the risks of poor decisions are greater than ever. Logical thinking requires reasoning and facts. It's needed to instil sensible strategies to a problem that allow you to make rational conclusions about how to proceed. A lack of logical thinking within your teams and your business can be disastrous.

This workshop will provide a practical introduction to logical reasoning, explore key concepts and ideas with a pragmatic view toward implementation, and deliver hands-on exercises for developing your own logic and reasoning skills.
