ABOUT THE EVENT

While there has been considerable improvement in gender representation and diversity in workplace health and safety roles, women remain under-represented in senior leadership roles. To survive and thrive as a successful safety leader, you must capitalise on your unique strengths and align your vision with the values of your organisation. Learn how to step back and step up, emerging as an influential safety leader in your organisation.

This hands-on, two-day interactive learning session will equip you with a practical leadership plan that you can use to navigate a successful career and advance to senior levels.

You will also have front-row seats for an exclusive Women in Safety leaders panel, exploring ways you can raise your profile as a leader and accelerate your career.

Book now to secure a seat and take the next step in your career.

TRAINING DELIVERY AND PRE-COURSE QUESTIONNAIRE

This workshop will be delivered using a three tiered approach. The structure of each session is as follows:

1. Technical overview and review of research into the topic area under discussion
2. Practical application of management principles in the review of case studies, worked examples and interactive exercises
3. Discussion of outcomes and implementation issues

Workshop participants will have the opportunity to include comments and questions about issues outlined in the program by way of a pre-course questionnaire. This feedback will enable the course facilitator to adjust content accordingly. The workshop has limited places to allow for customisation, greater interactivity and for individual concerns to be addressed.
