ABOUT THE EVENT

The rapidly evolving world of logistics and supply chain presents unique challenges and rewarding opportunities for you to shine as a leader. To step up into leadership, you must learn to manage the complexity of a segmented contract workforce, understand its intricacies and interdependencies, as well as technical competencies like contracting and Chain of Responsibility. You may also encounter more personal challenges, like unconscious bias and imposter syndrome.

This specially designed two-day program will help crack the code to lead (and live) courageously. Explore the potential of a strengths-based leadership approach, effectively manage risk, build high-performing teams, and influence key stakeholders throughout the chain. Walk away with the tools and knowledge to build resilience and position yourself to advance your career in supply chain and logistics.

TRAINING DELIVERY AND PRE-COURSE QUESTIONNAIRE

This workshop will be delivered using a three tiered approach. The structure of each session is as follows:

1. Technical overview and review of research into the topic area under discussion
2. Practical application of management principles in the review of case studies, worked examples and interactive exercises
3. Discussion of outcomes and implementation issues

Workshop participants will have the opportunity to include comments and questions about issues outlined in the program by way of a pre-course questionnaire. This feedback will enable the course facilitator to adjust content accordingly. The workshop has limited places to allow for customisation, greater interactivity and for individual concerns to be addressed.
